Skillbox

Основные паттерны проектирования игр

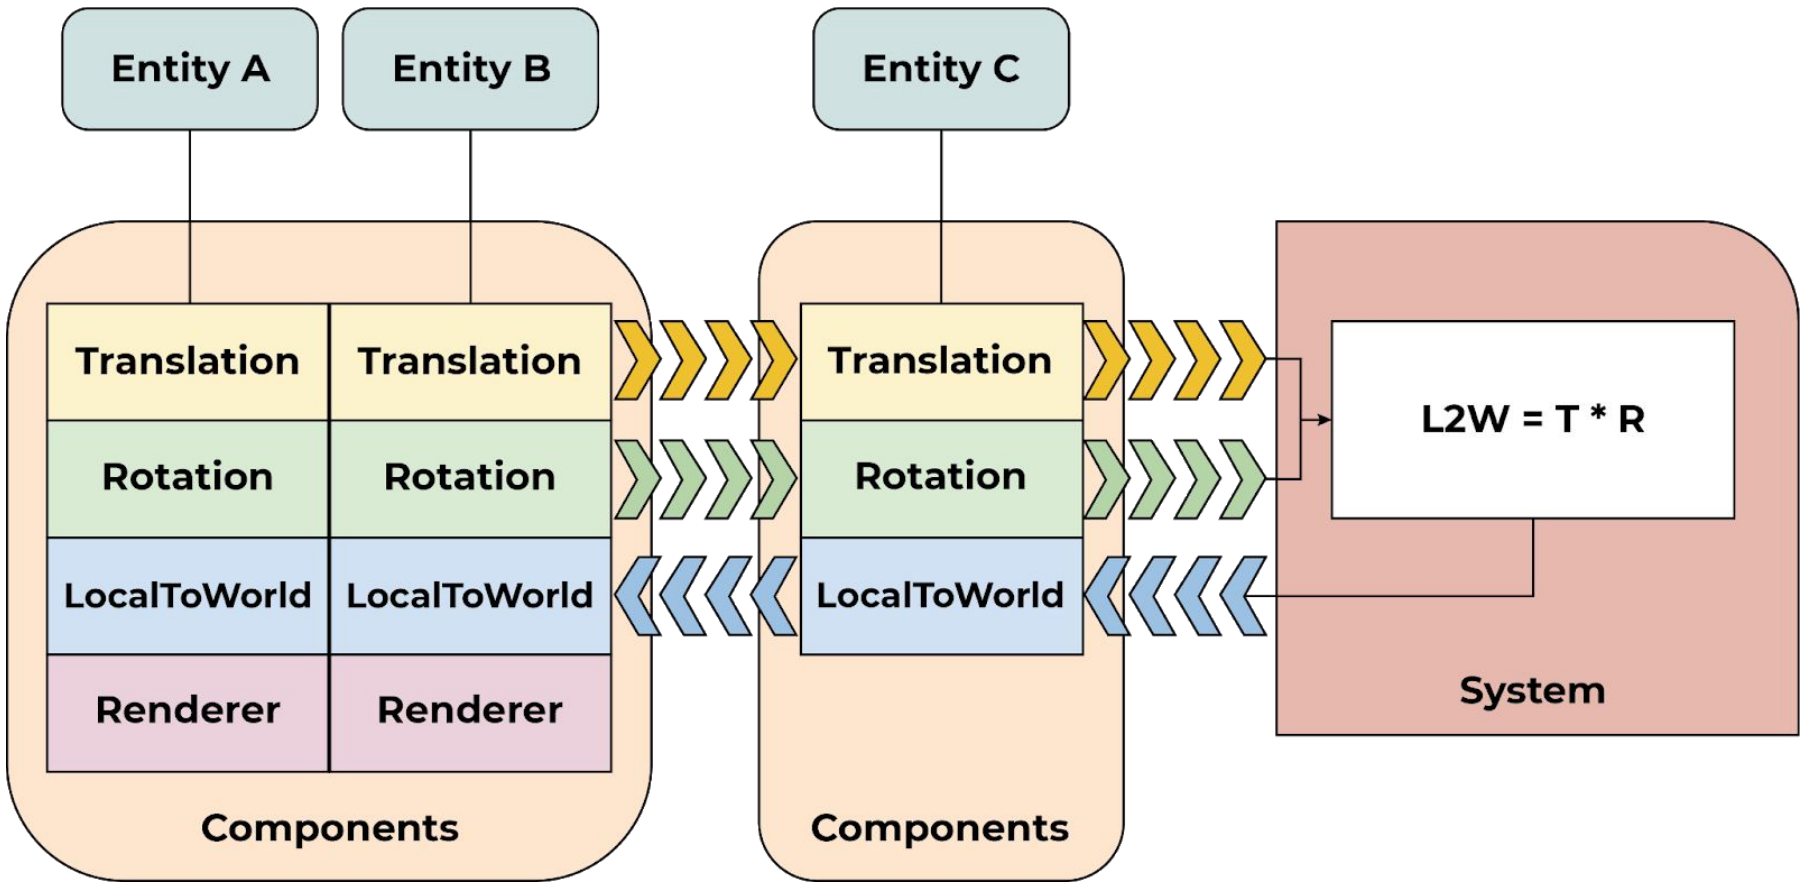

- MVC
- ECS
- Command
- Observer
- FSM
- Factory
- Object pool
- Singleton
- Event bus
- Dependency injection / IoC
- Service locator

Skillbox

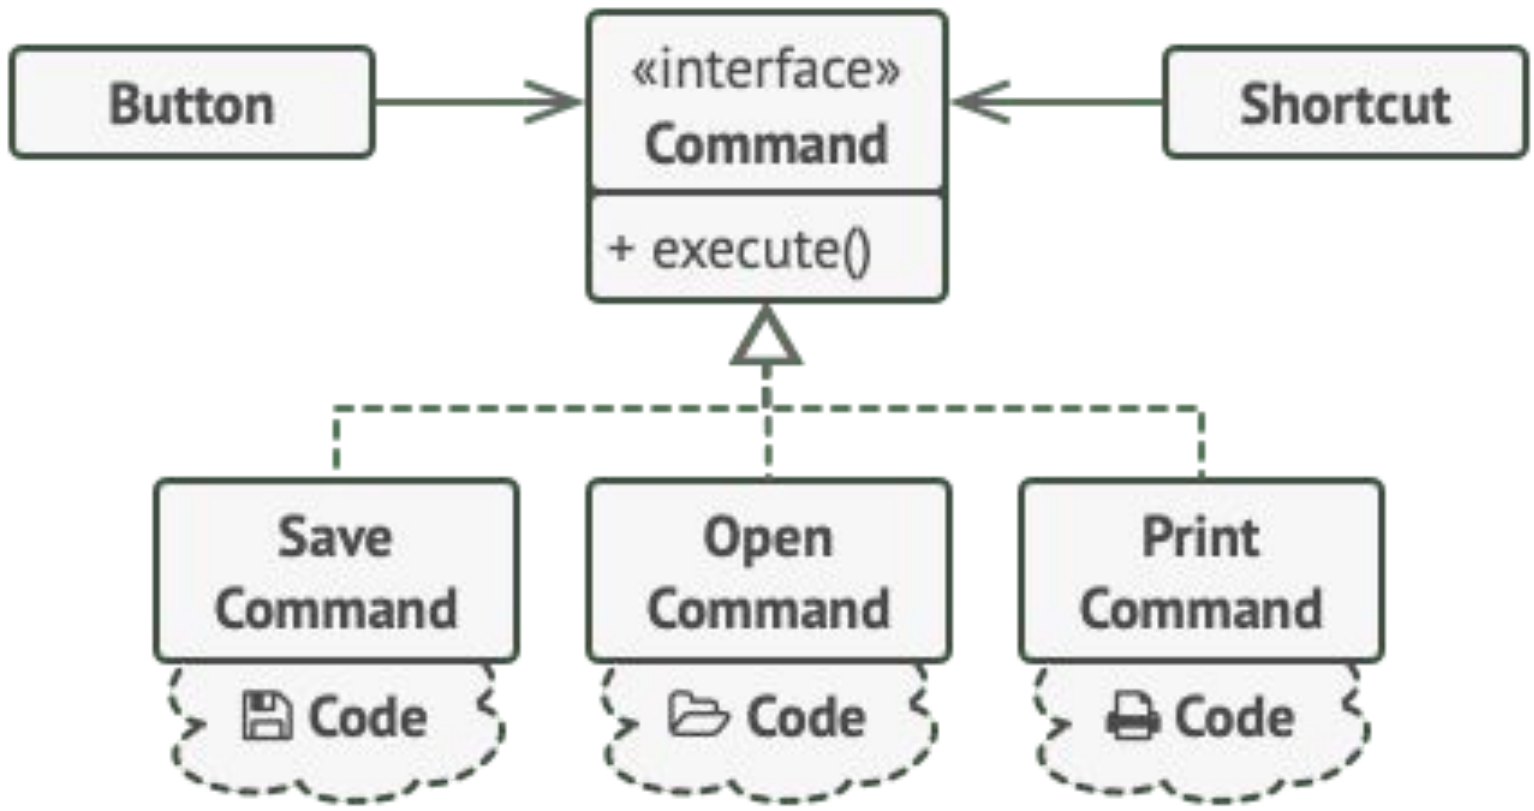

Model-View-Controller

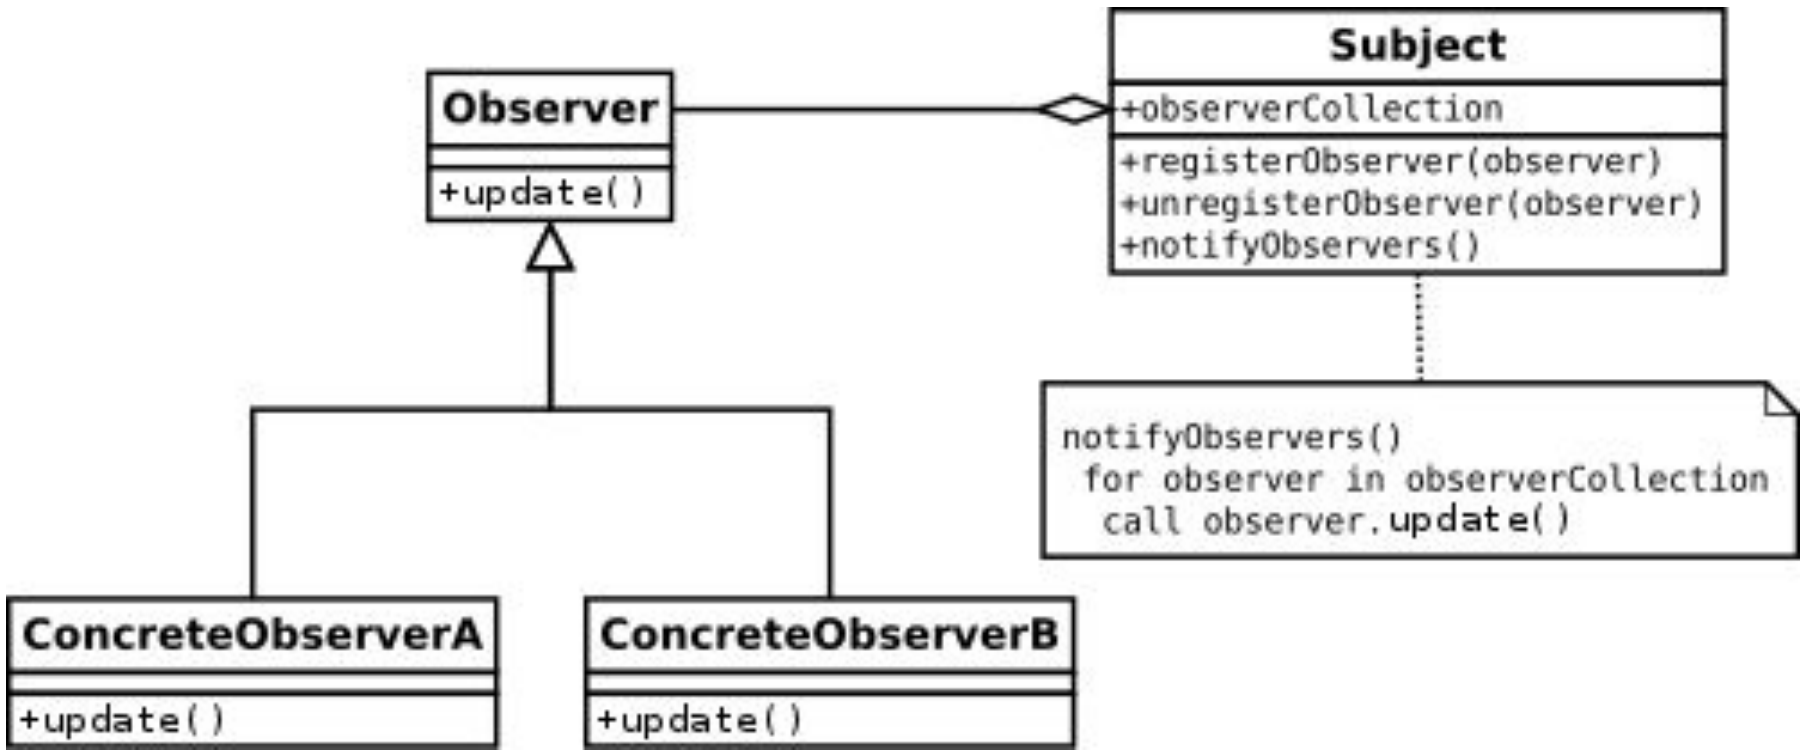

Entity Component System

Command

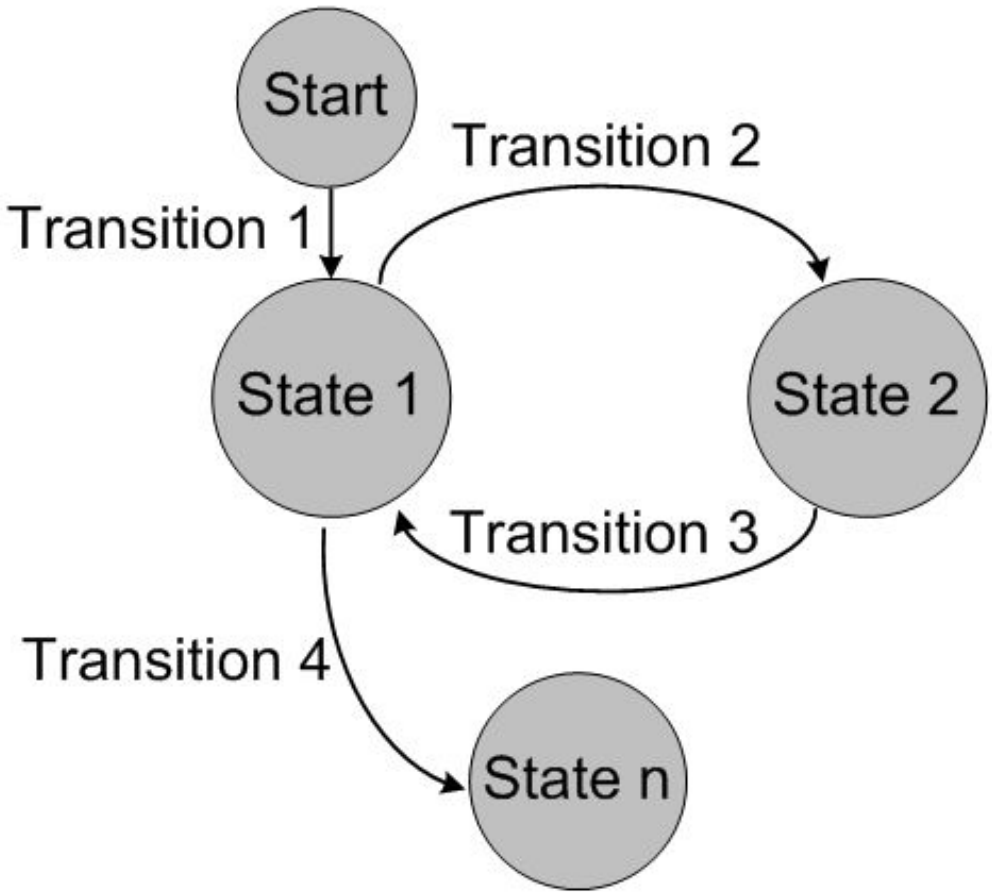

Button
«interface»
Command
+ execute()
Shortcut
Save
Command
Code
Open
Command
Code
Print
Command
Code

Observer

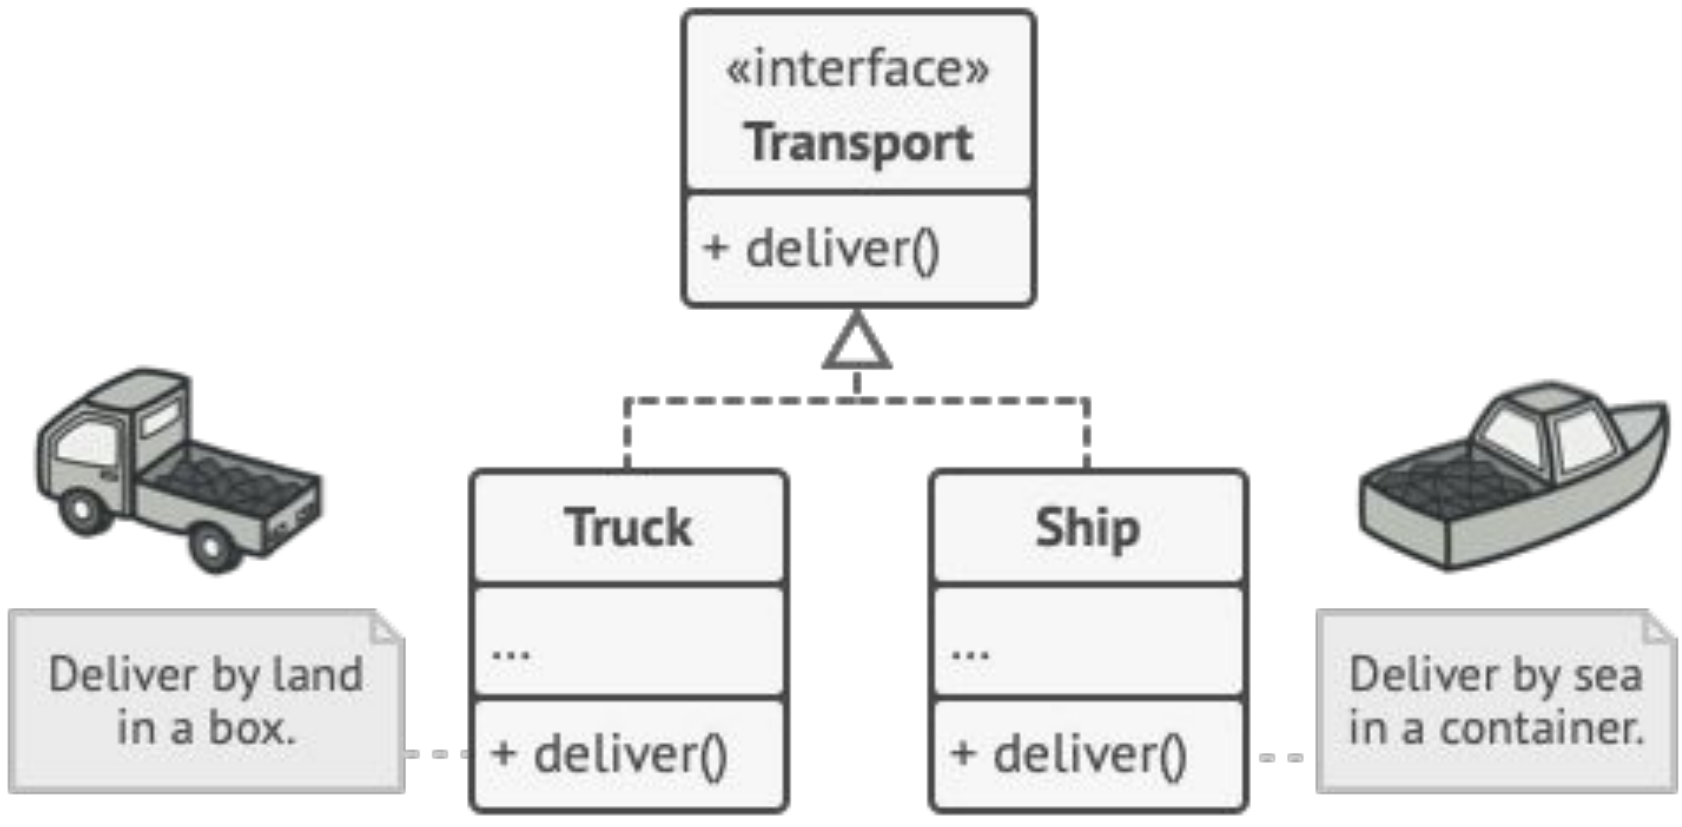

Subject
+observerCollection
+registerObserver(observer)
+unregisterObserver(observer)
+notifyObservers()
Observer
+update()
notifyObservers()
for observer in observerCollection
call observer.update()
ConcreteObserverA
+update()
ConcreteObserverB
+update()

Skillbox

Finite-State-Machine

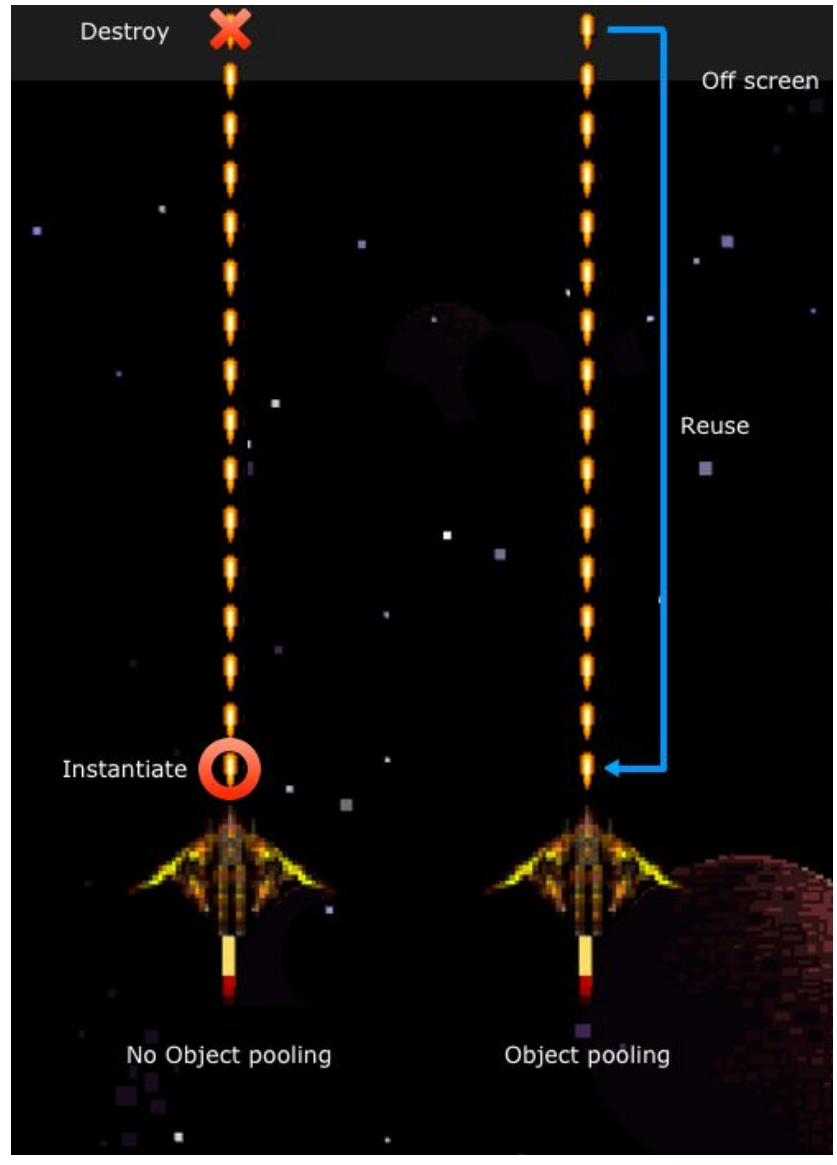

Factory

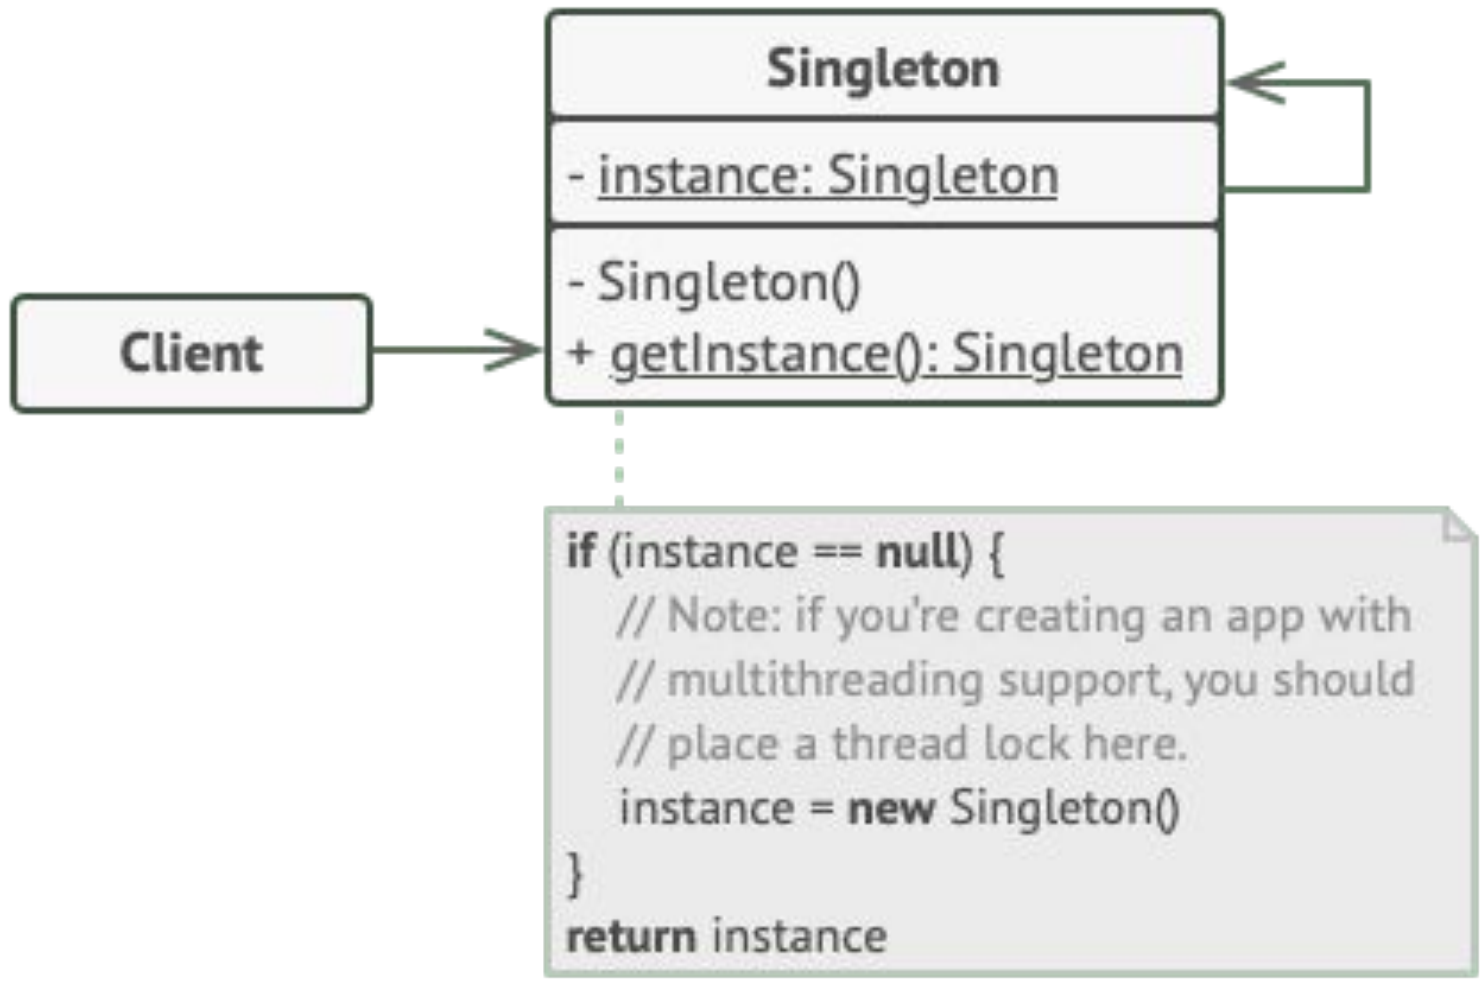

«interface»
Transport
+ deliver()
Truck
...
+ deliver()
Ship
...
+ deliver()
Deliver by land
in a box.
Deliver by sea
in a container.

Skillbox

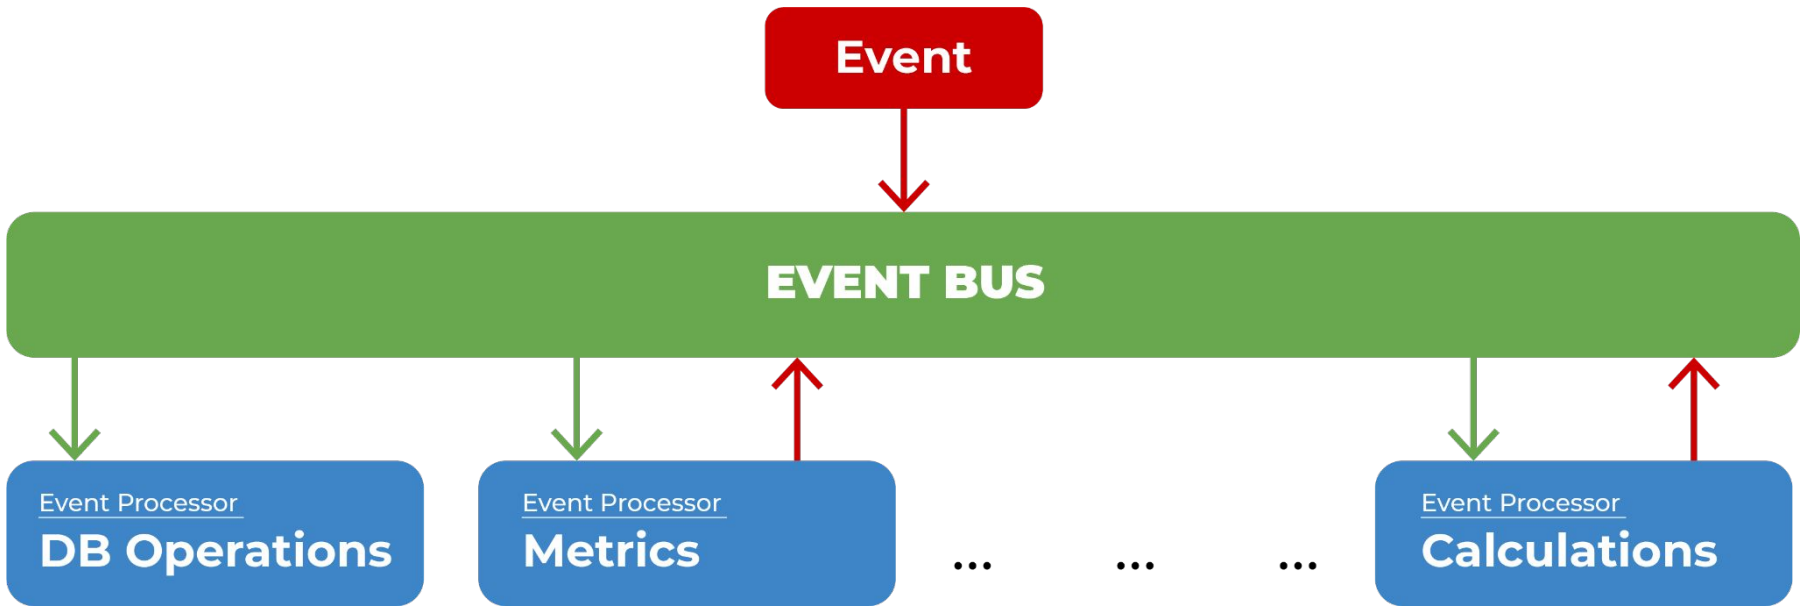

Object Pool

Singleton

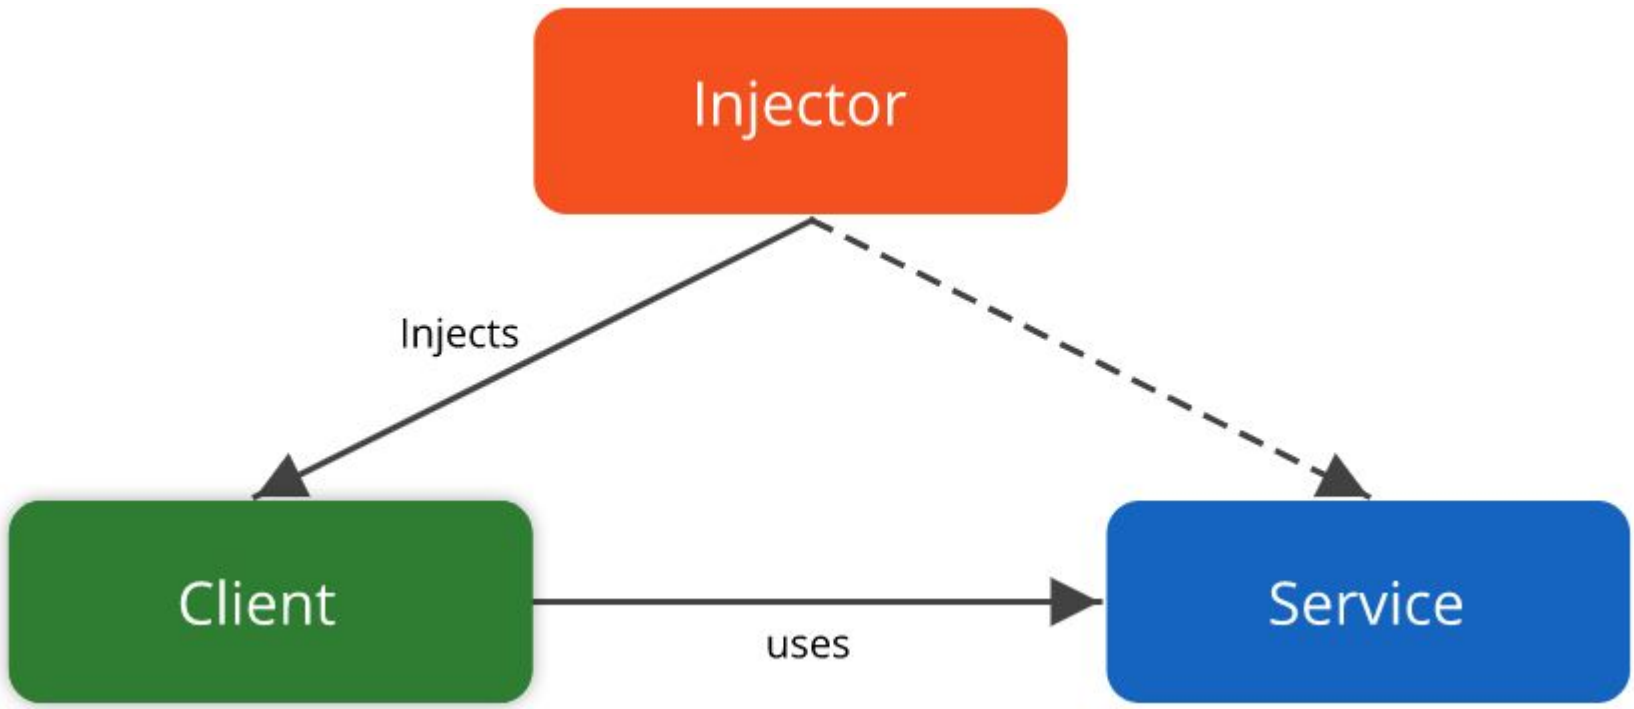

Singleton
- instance: Singleton
- Singleton()
+ getInstance(): Singleton
Client
if (instance == null) {
// Note: if you're creating an app with
// multithreading support, you should
// place a thread lock here.
instance = new Singleton()
}
return instance

Event Bus
